Update Instructions

If you are installing this script for the first time then don't need to follow these instructions.

1. If you are already using this script then just upload **credit-lite-update.zip** file and **extract** that file into the previous installation directory. All files will be replaced automatically.

2. You need to enter a URL on your browser for updating new database tables. If your website link is https://www.example.com then you need run https://www.example.com/migration/update

3. That's it. You can now use the updated version of Credit Lite System.
